

Disposable Stimulation Probes

Monopolar and bipolar

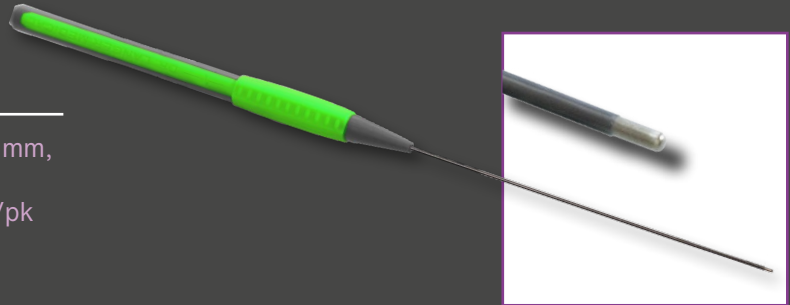

The art
of neuromonitoring

40-1303

Monopolar disposable stimulation probe

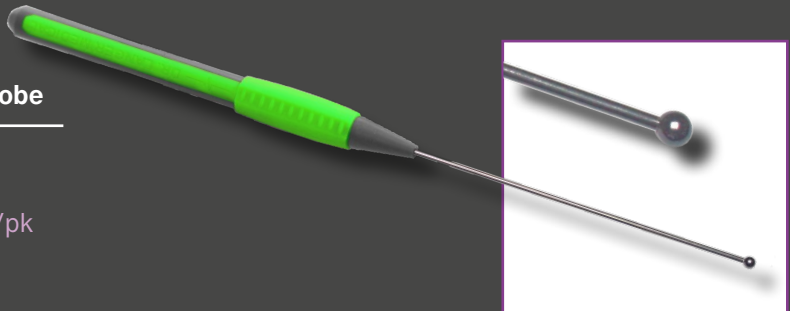

shaft length 90 mm, insulated shaft, Ø 0.8 mm,
cable length 2.5 m, with DIN 42802-1
connectors, individual sterile packaging, 5/pk

40-1306

Monopolar disposable stimulation ball probe

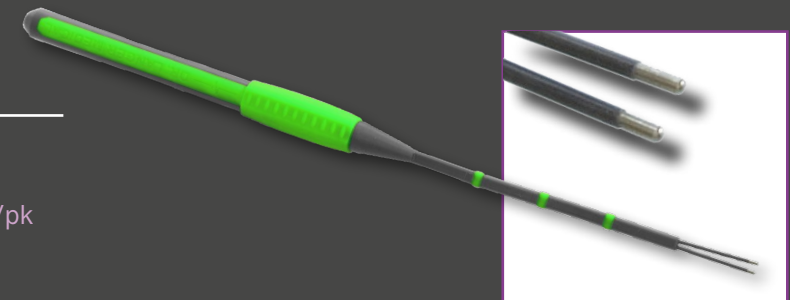

shaft length 90 mm, ball Ø 2.4 mm,
cable length 2.5 m, with DIN 42802-1
connectors, individual sterile packaging, 5/pk

40-1304

Bipolar disposable microfork probe

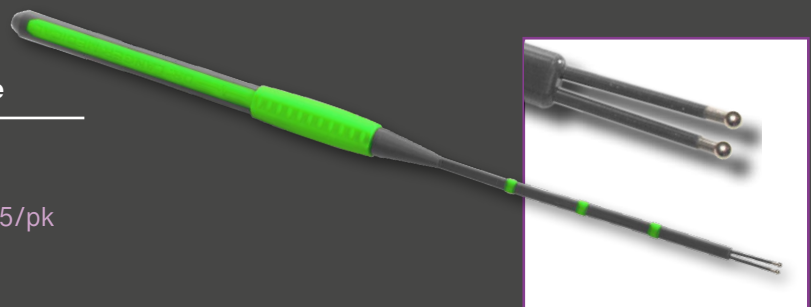

shaft length 90 mm, Ø 0.7 mm,
cable length 2.5 m, with DIN 42802-1
connectors, individual sterile packaging, 5/pk

40-1308

Bipolar disposable microfork ball probe

shaft length 80 mm, ball Ø 1.2 mm,
cable length 2.5 m, with DIN 42802-1
connectors, individual sterile packaging, 5/pk

40-1307

Bipolar concentric disposable stimulation probe

shaft length 60 mm, 30° angle tip, Ø 1.2 mm,
cable length 2.5 m, with DIN 42802-1
connectors, individual sterile packaging, 5/pk
